Headlines

Long-term power prices fell this week following decreases in their gas equivalents. Annual April 14 baseload power dropped 2.8% to £50.4/MWh as its gas counterpart fell 3.7% to 63.8p/th. Day-ahead baseload power decreased 4.9% to £44.9/MWh with increased wind output and falls in coal and gas prices. Lower demand and high LNG supply contributed to day-ahead gas falling to a seven-month low of 61.2p/th. The annual April 14 clean spark spread rose 1% to £2.3/MWh as gas fell faster than power. The annual April 14 clean dark spread fell 8.3% to £17.6/MWh. Month-ahead Brent crude oil rose 0.4% to a weekly average of \$107.4/bl, as increased demand in the US outweighed bearish concerns over emerging economies and weakening economic data from China to drive up prices on average.

Baseload electricity

- This week, long-term baseload power contracts fell on the back of lower gas and coal and prices. Summer 14 power dropped 3.7% to £47.0/MWh.
- Annual April 14 baseload also decreased 2.8% to £50.4/MWh and is now 2.8% lower than last month's value of £52.6/MWh.
- Day-ahead baseload power dropped 4.9% to £44.9/MWh compared to last week. It is now 0.2% lower than last month.
- The contract fell with higher wind output towards the end of the week and substantial falls in gas prices.

Annual April contract

Forward curve comparison

Peak electricity

- Long-term peak power contracts decreased this week, as demand fell.
- The annual April 2014 peak power contract fell 2.4% to £57.9/MWh.
- Day-ahead peak electricity decreased 6.8% to £51.8/MWh.
- The day-ahead peak contract is 6.8% lower than last month and 5% below last year's value.

Annual April contract

Forward curve comparison

Seasonal power prices

Seasonal power contracts

- On average, winter power contracts decreased 1.2% over the week. Winter 14 was 1.6% lower at £54.8/MWh
- Summer power contracts fell 0.6% on average over the week. Summer 14 power dropped 0.2% to £48.8/MWh.

Seasonal power curve

- The summer 14 power contract decreased 3.3% from last month's level of £50.5/MWh.
- The summer 14 power contract is now lower than the price in 2013, falling 4.2% from £51.0/MWh.

Supplier hedging strategies

The annual April 14 gas contract climbed 1.7% in December to an average of 68.2p/th and the annual April 14 baseload power contract followed by rising 1.4% to £53.1/MWh. Higher priced winter contracts are feeding into retail prices and electricity and gas prices for this winter are expected to be 5% higher than last year. Prices have not yet reached their peak and are expected to increase slightly by February. On 9 January SSE said it would reduce gas and power tariffs by 3.5% from 24 March. On the same day Npower announced it would be reducing its tariffs by 2.6% from 28 February. These reductions are the result of savings in third party charges and not changes in wholesale prices.

Although both Ofgem's and our assessments show a similar overall trend, the incorporation of nearer-term prices makes our assessments more volatile than Ofgem's smoothed quarterly and seasonally based approach.

Wholesale price snapshot

Key market indicators:

31/01/2014

	Gas (p/th)		Electricity (£/MWh)		Coal	Carbon	Brent crude
	Day-ahead	Year-ahead	Day-ahead	Year-ahead	(\$/t)	(€/t)	(\$/bl)
This week 31 Jan 14	61.20	63.75	44.90	50.35	83.50	5.73	107.74
Last week 24 Jan 14	66.00	66.18	47.20	51.78	85.15	4.97	107.31
Last month 3 Jan 14	65.25	67.23	45.00	52.63	81.70	4.82	108.52
Last year 1 Feb 13	66.70	67.85	46.90	53.45	99.80	3.45	115.63
Year-on-year % change	(8%)	(6%)	(4%)	(6%)	(16%)	66%	(7%)
Year high	118.00	71.15	86.00	54.25	100.70	5.83	118.81
Year low	54.75	66.98	41.40	47.93	80.70	2.70	97.70

This table shows the price this week compared with prices from the previous week, month and year. The graphs show the position of this week's prices with a red X and the range of prices over the year is represented by the black line.

About EDW Technology Limited

EDW has an extensive history of developing, implementing and supporting its 'best of breed' retail electricity software solutions.

In 2000, EDW began building a revolutionary new electricity software platform to support the rigorous demands of the UK's deregulated electricity supply market – a market characterised by rapidly changing government regulation, business processes, market rules, industry dataflows and customer demands. EDW were founded as a provider of high quality, end-to-end IT services and we have remained true to that aim ever since, servicing a range of companies in the energy industry.

For over 13 years, our software product ERS has empowered business electricity suppliers to transform customer experience, improve business efficiency, reduce costs to serve and improve profitability.

EDW has a UK based team of 85 employees working from the EDW offices in Milton Keynes.

Industrial and commercial billing specialists

The industrial and commercial electricity supply market has unique business requirements that need to be serviced with a specialised set of IT system capabilities. Sophisticated business customers are willing to actively engage in the management of their energy accounts and solutions need to provide tools that support enhanced service interaction. EDW has gathered an extensive knowledge of the industrial and commercial market sector that enables the delivery of a powerful set of system capabilities essential to your requirements to service this complex and demanding market sector.
